160 MHz ULTRA-MINIATURE LOGARITHMIC AMPLIFIER

120 MHz to 200 MHz
Log Linearity at 160 MHz +/- 1.0dB
Linearity over Temperature and Frequency +/- 2.0dB max

The Pascall Ultra-Miniature series of Logarithmic Amplifiers provide broadband performance and superb linearity over a wide temperature range.

The UMDS range of logarithmic amplifiers are robustly constructed in lightweight aluminium alloy housings and are designed to withstand harsh mechanical environments.

This range is specified for operation over a case temperature range of -45°C to +85°C. Supply voltage options are +/- 12 Volts and +/- 15 Volts with a total dc input power of 2.7 Watts.

The small size and weight makes these units an ideal choice for compact airborne equipment designs where low power dissipation is vital to maintain high reliability and performance.

Pascall has a large range of alternative logarithmic amplifiers covering centre frequencies from 10 MHz to 1 GHz and is also able to design models to meet customers’ specific requirements.
